Hi Candis,

I tried to take some pictures of how to install the cartridge. Please tell your customer to follow these steps to install the cartridge of the faucet.

1. As you seen in the picture, place the cartridge under the faucet body and plug A-->A and B-->B

2. Make sure the cartridge can't turn around in the main body, and twist the gold ring on top of it. (twist it as tight as you can with a spanner or other tool)

3. twist the silver vover on the gold ring

4. plug in the handle

5. use the below tool the twist screw inside the hole

6. plug in the hole cover

Please advise if you have questions of the procedure.

Thanks,
Joanne
