HOW TO INSTALL:

Place the fixture parts on a soft cloth-covered platform before installation of fixture.

1. Screw the Center column kit onto the distributor box.
2. Place the bottom bowl, check ring, bottom bobèche, check ring, in that order, over the bottom distributor box. Secure with the finial.
3. To install the glass arms, slightly loosen each screw on the top plate over the distributor box. Pull a female plug through a hole in the plate. Connect the male plug at the end of the arm with the female plug that was just pulled. Push the end of the arm with the metal tab through the hole until stopped by the metal tab (this should also push the wires and plugs back inside the metal plate). Twist the metal tab counter-clockwise until both inserts lock onto the loose screws. Tighten the screw securing the arm in place. Repeat for all arms.
4. Insert the scrolls onto the holder and put the bobèche over the socket.
5. Attach the mounting bar onto the outlet box.
6. Decide the desired hanging height and adjust the chain to the correct length.
7. Raise the fixture up and do the wire connection. Attach the canopy over the mounting bar and secure with collar ring.
8. Dress the crystals as illustrated.
