DIGITAL HOT TANK

MODEL # 7000

Introducing the Waterstone Instant Hot Water Heating Unit

Why wait for steaming, hot water? Get instant hot water on demand from the new Waterstone Digital Hot Tank.

The unit's digital interface allows you to set the adjust water's warmth to the exact temperature you desire. Anywhere between 167F and 208F degrees for that perfect cup of coffee or tea. The unit's built-in inline Pressure Regulator Valve protects lifespan of internal parts. An overheat sensor will automatically shut off if water gets low or runs out. Inside, is a 304 stainless steel water tank that is insulated for heat retention and noise reduction. An ABS plastic housing give the unit an lighter overall weight.

Digital Hot Tank works with any Waterstone Hot and Cold, or Hot Only Filtration faucets.
